

To whom it may concern. I have been recently informed of a possibility of losing my ability to actually get traffic reports when I am on the road & without all of the other junk that goes along with it as we hear on regular radio stations. I am asking that you reject NAB's petition 04-160 & continue to allow me the right that I pay for as a taxpayer in this country. We can't let the large companies dictate to others how things need to be just because they are unhappy with the outcome that may take place. Thank you for hearing what I have to say & good luck in your decisions!

Sincerely,
Michael Stickney
